COURSE

DESCRIPTION:

This course is introduction to accounting procedures and their underlying concepts and principles. Within this framework, accounting practice is integrated with the development of accounting information for effective decision making.

COURSE OBJECTIVES:

To develop an ability to analyze and record economic transactions in basic accounting format.

To acquaint the student with the accounting process, its terminology, and the information that it generates.

To introduce standards and problems of valuation, income measurement and disclosure in financial statements.

GRADING:

Attendance, Participation Hand In Assignments 5%

20% (4 assignment including a computer assignment)

Major Test I Major Test II Final Exam

20% 20% 35%

100%

COURSE CONTENT: Text Chapters 1 through 11. Problems and cases from the text and related materials to be distributed during the term.

An understanding of the accounting process within organizations is integral to a well-rounded program of business studies. This understanding will be useful, as confirmed by the business community, in any career option that the student chooses and serves as an academic base for further studies in accounting.

Students are encouraged to discuss this course with the instructor at any time.
