**INSTRUCTIONAL
APPROACH:**

The course will be offered as three hours instruction and two hours lab per week (3-0-2) for a total of five hours per week. The allocation of instructional time and lab time will be at the individual Instructor's discretion.

For each topic listed below, there will be a classroom lecture/discussion and a demonstration of related accounting procedures. Relevant textbook readings, exercises and problems will be assigned. Weekly quizzes and/or hand-in assignments may be administered. Your knowledge, understanding and application of the material will be tested in three written examinations. Examinations will consist of exercises, problems and multiple choice questions.

Regular classroom attendance is expected. Be late at your own peril. Assigned reading materials should be studied both before and after it is discussed in class. Your understanding should be applied by performing the assigned homework problems. Ask questions in class, especially about any topics where you are confused or uncertain. The Instructors will be available during office hours to further assist students.

This course requires considerable time and effort on the part of students, so the adoption and adherence to effective learning habits is essential. It is difficult to catch up once a student falls behind in readings and problems.

**COURSE
DESCRIPTION:**

This course, in conjunction with BA 1120, provides an introduction to accounting procedures and financial statements, and their underlying concepts and principles. Within this framework, accounting practice is integrated with the development of accounting information for effective decision-making.

Accounting is the language of business, and the goal of accounting is to provide reliable and relevant financial information to decision-makers, both within and outside an entity.

This is a course in Accounting, not bookkeeping, and not Income Tax, therefore specific Income Tax rules, practices, definitions, considerations and consequences while interesting are not particularly relevant.

COURSE OBJECTIVES:

To develop an ability to analyze and record economic transactions in basic accounting format.

To acquaint the student with the accounting process, its terminology, and the information that it generates.

To introduce generally accepted accounting principles (GAAP), standards and the problems of valuation, income measurement and disclosure in financial statements.

GRADING:

Attendance, participation.....	5%
Hand in assignments, quizzes	20%
(Approximately 10-12 in total)	
Major Test I	20%
Major Test II.....	20%
Final Exam CUMULATIVE	35%
Total	100%

The individual Instructor reserves the right to modify this allocation to suit the requirements of the individual sections of this course.

Grande Prairie Regional College uses the Alpha (4-Point) Grading system. The following chart shows the Alpha grades and corresponding GPAs and percentage ranges for this course.

Designation	Alpha Grade	4 Point Scale	Percentage
Excellent	A+	4.0	90 - 100
	A	4.0	85 - 89
First Class Standing	A-	3.7	80 - 84
	B+	3.3	76 - 79
Good	B	3.0	73 - 75
	B-	2.7	70 - 72
Satisfactory	C+	2.3	67 - 69
	C	2.0	64 - 66
	C-	1.7	60 - 63
Minimal Pass	D+	1.3	55 - 59
	D	1.0	50 - 54
Fail	F	0.0	0 - 49

Professional accounting bodies generally require that students obtain a minimum of C+ in BA 1110. Other post secondary institutions may require a minimum of C- for transfer credit.

**COURSE
CONTENT:**

Text Chapters 1 through 11. Problems and cases from the text and from related materials that may be distributed during the term.

An understanding of the accounting process with is integral to a well-rounded program of business studies. This understanding will be useful, as confirmed by the business community, in any career option that the student chooses and serves as an academic base for further studies in accounting.

Students are encouraged to discuss this course with the applicable Instructor at any time.
