COURSE DESCRIPTION

This course, in combination with its prerequisite (Psych. 1040), is intended to provide a general introductory survey of the field of psychology. Specific topics examined in this course include: psychological testing; various theories of personality; social psychological phenomena such as social roles, attitude change, and the effects of groups upon the individual; behavioral disorders (abnormal psychology); and various types of therapy.

The course is not designed to be a course in applied psychology. Instead, it is intended to familiarize the student with the terminology employed by psychologists, to develop the student's tolerance for ambiguity (e.g., an appreciation for why psychologists disagree), and to develop an understanding of basic psychological concepts and processes.

To facilitate teaching the student what the discipline of psychology is, there will be a greater emphasis upon examining how psychologists "do psychology" and slightly less of an emphasis upon learning the "known facts."

COURSE OBJECTIVES:

The successful student should demonstrate an understanding of the relevant concepts, terminology and theoretical assumptions which will be examined. The student should also be able to demonstrate a basic familiarity with, and an understanding of, the relevant experimental procedures and the results of our more significant psychological studies.

It should be noted that students will be held accountable for lectures delivered in addition to any announcements that will be made in class. If any student is unable to attend a particular class, it will be his/her responsibility to find out what was missed.

If it becomes apparent to a student that s/he will be unable to write an exam/quiz/reading discussion at a scheduled time, the student should notify the instructor immediately². In the event that the student cannot reach the instructor in person, s/he should leave a message for the instructor on the answering machine (539-2994). If the student is unable to write the final exam at the scheduled time³, he/she should notify the instructor in advance and submit an application to the Registrar's office for permission to write a deferred exam (see the College calendar re: deferred exams).

The exam dates listed on this handout are tentative and are subject to change due to unforeseen circumstances. Students should not make plans for travel, holidays, employment, etc., which would interfere with their writing exams during any scheduled class time. As well, students should not make plans that would conflict with their writing final exams during the scheduled times (times to be announced by the Registrar's office).

Since the information recorded on this sheet will be required by the student throughout the semester, I recommend that precautions be taken to insure that it is not lost.

Students are strongly encouraged to see me after class or in my office (C403) if they are having difficulty in the course or simply wish a further discussion of the material.
